I have recently moved a test vps over to a new second hard drive.

And have setup the new hard drive under partition "vps" the new vps is setup correctly under /vps/root and /vps/private.

However when i try to start the vps on the 2nd hard drive it fails displaying a quota error
"Starting VE ...
vzquota : (error) Quota on syscall for 202: No such file or directory
vzquota on failed [3]"

Do i need to enable an option on the new partition/hard disk.

Thanks
