Subject: One NIC, Multiple Gateways

I have two gateways and one NIC. I want to be able to send some of the VPS to one gateway and some to another. I have been trying to accomplish this by altering the routing within the a particular VPS without success. The venet0 structure is different from what I am used to and I can't seem to find a way around or through the 191.255.255.1 interface.

Further illustration:
Host: 192.168.0.130, default route: 192.168.0.1
VPS101: 192.168.0.131
VPS102: 192.168.0.132
I want to make VPS102 route through 192.168.0.254 instead of 192.168.0.1 (the default configuration).

Am I going about this the wrong way? Is it even doable?

Thanks,
blyoung
