I am trying to install the x64 kernel on a x64 copy of CentOS 4.5

However it fails, and outputs the following, any idea on a fix, or advice.

```
[root@node01 ~]# rpm -ihv
http://download.openvz.org/kernel/branches/2.6.18/028stab039.1/kernel-smp-2.6.18-ovz028stab0
39.1.x86_64.rpm
Retrieving
http://download.openvz.org/kernel/branches/2.6.18/028stab039.1/kernel-smp-2.6.18-ovz028stab0
39.1.x86_64.rpm
