Hi,

There is weird behavior with some of my openvz servers, regarding time.

[root@ve~]# date
Thu Jul 12 06:59:15 EDT 2007

One log entry in maillog:
Jul 12 14:46:06 ve sm-msp-queue[30376]: starting daemon (8.13.1): queueing@01:00:00

Funny thing is that if I use logger, the date is OK.

Jul 12 07:00:26 vz01 ugob: hello!

Any ideas on how to diagnose this?

Thanks,

Ugo
