Hi,
when I try to use commands like vzpkgcache or vzyum I am facing the problem:

[root@symson ~]# vzyum 604 install sendmail
ERROR: RPM python path not found: /usr/share/vzpkgtools/vzrpm43/lib/python2.5/site-packages
[root@symson ~]#

HN: Fedora Core 7
Kernel: 2.6.18-8.1.4.el5.028stab035.1 #1 SMP

zone 604 has been created with centos-4-i386-default template.

Please help me.
