Hi!
I have restarted VE - vzctl restart XX -
it showed me-
vzctl restart 42
Restarting VE
Starting VE ...
VE is mounted
Adding IP address(es): xx.xx.xx.xx
Unable to add IP xx.xx.xx.xx b: Address already in use
VE start failed
Stopping VE ...
VE was stopped
VE is unmounted

It seems a problem that VE was not stoped during restart, but now it marked as stoped and status is stoped!

when i try to start it - adress already i use.

How can i manually stop using IP by VE ?

I think bug in vzctl.

vzctl 3.0.16
