Subject: *SOLVED* failcount, but how?
Posted by flbo on Mon, 05 Feb 2007 19:03:53 GMT

Hi
After some hours of working I have this line in user_beancounters.

privvmpages   81587   126708   131072   131072   24

But how can it be? the max held is smaller that both barrier and limit.

Regards Flemming
