Subject: *SOLVED* IT8212 Module (P-ATA)

Hi,

i have installed the ovzkernel-2.6.15-025stab014.1 everything works perfectly only the IT8212 Raid Controller makes problems.

If i boot with the Fedora Core (2.6.15-1.1831_FC4) kernel the sd_mod is loaded for the IT8212 Raid Controller. But if i boot with the openvz kernel the Raid Controller Module (sd_mod) will not loaded! I don't found any module for it.

I tried some things, but i had no success!
1st TRY:
tried to compile the sources of the controller (get many errors)

2nd TRY:
copied the sd_mod.ko to openvz-kernel and made "depmod -a" and "modprobe sd_mod"
(error-message: FATAL: Error inserting sd_mod
(/lib/modules/2.6.15-025stab014.1/kernel/drivers/scsi/sd_mod .ko): Invalid module format)

Have anyone a solution?

thanks
stefan
