Hi,

I have been trawling the web for a free web based amin panel to test a few VE before putting into a production enviroment.

I saw this one:

http://forum.openvz.org/index.php?t=tree&th=230&mid= 1058&&rev=&reveal=

Was just wondering is there were any free ones out there, not HyperVM or the inproduction RoboVZ.

I would mind creating a simple one, but need to look at some code first.

Thanks
