Subject: Is it possible to postpone/schedule the vzquota recalculation (after HN power failures etc)?

Upon HN power failures etc, it will take our VE:s around 4-5 hours to start because of vzquota recalculation. Having the VE:s start and then recalculate one on one (using VZFASTBOOT=yes) sounds like a step in the right direction, but still means a lot of sudden down-time for each VE.

Is there any possibility to schedule this recalculation to run at a certain time, so that it can be performed during low-traffic hours or planned maintenance time?

Note: This was written as a reply to this thread: http://forum.openvz.org/index.php?t=msg&goto=30200& , which is read only.
