Here is my problem.
vzctl start 201
Starting VE ...
Initializing quota ...
vzquota : (error) Quota is running, stop it first
vzquota init failed [5]

vzquota stat 201
vzquota : (error) Can't open quota file for id 201, maybe you need to reinitialize quota: No such file or directory

. /var/vzquota/quota.201 does not exist. Maybe it got deleted somehow (by a human error of some kind).

How should i "rebuild" the quota file?

And for another VE,
vzctl stop 203
Stopping VE ...
VE was stopped
vzquota : (error) Quota off syscall for id 203: Device or resource busy
vzquota off failed [3]

Thank you
