part of error message:

Running depmod.

Finding valid ramdisk creators.

Using mkinitrd.yaird to build the ramdisk.

yaird error: bad value in /boot/config-2.6.18-openvz-sparc64-smp:

CONFIG_DEFCONFIG_LIST="/lib/modules/\$UNAME_RELEASE/.config" (fatal)

mkinitrd.yaird failed to create initrd image.

Failed to create initrd image.

dpkg: error processing linux-image-2.6.18-openvz-sparc64-smp (--install):

 subprocess post-installation script returned error exit status 9

Errors were encountered while processing:

 linux-image-2.6.18-openvz-sparc64-smp

The HN is running ubuntu 6.0.6 , current kernel is 2.6.15-26-sparc64-smp

Any suggestion?

Sam Zhu
