Subject: [solved] 32bit binary in 64bit VE

I'm having trouble getting a 32bit executable running inside a 64 bit VE. It runs fine in the host node but the VE doesn't like it. The binary is the Perforce client so I can't recompile it as 64 bit. 32 bit compatibility is built into the HN kernel.

```
vz # ldd /vz/root/1002/usr/local/bin/p4
        libc.so.6 => /lib32/libc.so.6 (0xb7e33000)
        /lib/ld-linux.so.2 (0xb7f6e000)

vz # vzctl exec 1002 ldd /usr/local/bin/p4
        not a dynamic executable
```
