I just had this weird thing happened today.

I have a container with both venet and veth created .

venet has ip 10.48.5.201
veth has ip 10.48.5.211

From my windows box, I can ping 10.48.5.211 no problem. but when I ping 10.48.5.201 , this is what came out :

Pinging 10.48.5.201 with 32 bytes of data:

Reply from 10.48.5.201: bytes=32 time=1ms TTL=64
Request timed out.
Request timed out.
Request timed out.

Ping statistics for 10.48.5.201:
    Packets: Sent = 4, Received = 1, Lost = 3 (75% loss),
Approximate round trip times in milli-seconds:
    Minimum = 1ms, Maximum = 1ms, Average = 1ms

And the weirdest thing is that I can ping 10.48.5.201 from all other linux OS. But the windows just don't have a positive response for it. Most of the time I can't even get one ping at all.

Please Help
