hello,

i have change my kernel to 2.6.18-ovz028test015.1-enterprise,

my VZ has two network cards with two subnets (public and private)

but the VE's can't ping internet on boot of server ,
i must do this actions for VE work correctly :

```
/etc/init.d/vz stop
ifconfig eth1 down (private subnet)
/etc/init.d/vz start
vzctl start 130
.
.
.
ifconfig eth1 up
vzctl enter 130
ping x.x.x.x -> ok
```

best regards
