Ok

In situation when no network:

1) try to determine, where packets are lost.

ping x.x.x.x from VE in background, tcpdump (venet|veth) inside VE and on the node, tcpdump public interface

2) `ip r l` on the node and inside VE

3) `sysctl net.ipv4.ip\_forward`

In situation when network ok:

2) `ip r l` on the node and inside VE
