Hello,

I've searched the archives and still not found a solution (though many are close).

Please forgive the (likely) easy to answer question:

My ve's cannot use iptables:

iptables v1.3.5: can't initialize iptables table `filter': Table does not exist (do you need to insmod?)
Perhaps iptables or your kernel needs to be upgraded.

lsmod shows:

```
# lsmod  | grep -i "tables"
ip_tables              18760  1 iptable_filter
x_tables               19204  10  ip_tables,xt_tcpudp,xt_length,ipt_ttl,xt_tcpmss,ipt_TCPMSS,x
t_multiport,xt_limit,ipt_tos,ipt_REJECT
```

and /etc/vz/vz.conf :

```
# grep -i tables /etc/vz/vz.conf
IPTABLES="ipt_REJECT ipt_tos ipt_limit ipt_multiport iptable_filter iptable_mangle ipt_TCPMSS
ipt_tcpmss ipt_ttl ipt_length"
IP6TABLES="ip6_tables ip6table_filter ip6table_mangle ip6t_REJECT"
```

What am I missing?

Thanks in advance.
