Hello,
I've got a problem using mount --bind. I cannot see bind mounted folder from within VE.

How to reproduce:
host# mount --bind /vps/v1/etc /vps/v1/mnt
host# ls /vps/v1/mnt
as expected, shows contents of /vps/v1/etc
host# vzctl exec 1001 ls /mnt
shows something different (cdrom floppy)
v1# ls /mnt
the same

Additional information:
vzctl exec 1001 cat /proc/mounts
simfs / simfs rw 0 0
proc /proc proc rw 0 0
devpts /dev/pts devpts rw 0 0

Versions: vzctl-3.0.10-alt5, kernel-image-ovz-smp-2.6.16-alt4 (contains kernel-feat-core-openvz-026test015-alt1)

Any ideas?

Thanks.
Ildar
