hi,
when I use yum install ovzkernel, and it show me some errors:

Error: glibc conflicts with kernel < 2.6.9
Error: kudzu conflicts with kernel < 2.6.13
Error: hal conflicts with kernel < 2.6.15
Error: initscripts conflicts with kernel <2.6.12

what the problem is ???

I install a new FC5, and update packages to newest.

Plz help me ..thx...QQ
