Hi Sam Zhu,

you can get a valid OpenVZ sparc64 kernel-config file from your
linux-image-2.6.18-openvz-sparc64-smp_028test007.1d1-1_sparc .deb

copy it to your linux-kernel-tree

```
# cp /boot/config-2.6.18-openvz-sparc64-smp /usr/src/<openvz-kernel-tree>/.config
```

Modify your config

```
# make menuconfig
```

and build new sparc64-kernel ...
