Subject: Problem Creating Template

I'm trying to create a template for a custom CentOS4 install.  I'm running the commands listed on the Wiki for CentOS template creation.

It seems to run fine for a good while when it drops out with the following error message :

tar:  Error exit delayed from previous errors.

It seems to consistently be doing that after I see /dev/ pop up.

I don't notice any previous errors either.

Anyone had this issue before????
