Hi.

Does anyone have a patch or a kernel source for a 64bit kernel with the latest ovz009.1 source applied. I want to use this patch together with drbd 8.3.1 if possible.

I have found a 2.6.24 source with ovz006.5 but nothing newer. This i patched fine with the drbd 8.3.1 but it is missing many of the newer fixes.

Thanks

Mark
