Hi,

Just made some scripts to have openwrt support as an openvz container here:

https://github.com/zoobab/openwrt-openvz

Any feedback appreciated.

Best,

"In July 2005, after several failed attempts to legalise software patents in Europe, the patent establishment changed its strategy. Instead of explicitly seeking to sanction the patentability of software, they are now seeking to create a central European patent court, which would establish and enforce patentability rules in their favor, without any possibility of correction by competing courts or democratically elected legislators."
