Hello all,

```
-bash-3.00# df -h
```

Filesystem	Size	Used	Avail	Use%	Mounted on
simfs	1000M	618M	329M	66%	/

I need to set some custom value for "Used" and "Avail" of statfs(). For example:

```
-bash-3.00# df -h
```

Filesystem	Size	Used	Avail	Use%	Mounted on
simfs	1000M	10M	990M	1%	/

Is there a quick way to do that? I've tried to use "vzquota init" for that with custom "-p" value, but without any success.
