Dear sir,

I have made 7 container in my laptop using 256 MB RAM i. e.
some of i am giving information as below.

VEID	NPROC	STATUS	IP_ADDR	HOSTNAME
121	21	running	190.10.41.121	iocgwiki
122	11	running	190.10.41.122	mysqliocgwiki

vps id 121 has mediawiki installed and vps 122 has mysql successfully migrated with 121 and running successfully when I connected with the network.
Problem is that how to run it locally i.e. on base machine without network connection. Can any one help me please?

Thanks with regards
Sanjay
