Hi guys, actually im using 2.6.18-92.1.18.el5.028stab060.8PAE (SMP) i was reading on KERNEL FLAVORS

the SMP is:

SMP symmetric multiprocessor up to 4 GB of RAM 10-20 Containers

my servers had 6GB ram, and i had like 15-25 containers.

wich one is the best kernel for me, and also Openvz guys, is the update ready? Vitaliy told me the 11 is gonna be released the update.

thanks
