Hello,

The answer on this question is also iptables related. So, you see, how important this tool is for networking. Please, find time to study it a little

If you assign private IP address to VE you should use NAT to give this VE an access to Internet. Look at this article: [http://wiki.openvz.org/Using\\_NAT\\_for\\_VE\\_with\\_private\\_IPs](http://wiki.openvz.org/Using_NAT_for_VE_with_private_IPs)

HTH,  
Vasily
