root@vps:~# cat /etc/fstab
proc /proc proc defaults 0 0
none /dev/pts devpts rw,usrquota 0 0
root@vps:~# touch /aquota.user /aquota.group
root@vps:~# chmod 600 /aquota.*
root@vps:~# mount -o remount /
mount: permission denied
root@vps:~# quotacheck -avugm
quotacheck: Cannot find filesystem to check or filesystem not mounted with quota option.
