Is anyone using openvz with openvswitch instead of linux bridging?
Are there performance improvements? Easier/better management?

regards, Eyck

I have looked at opevswitch in the past and it has some really nice
features. But I was under impression that openvswitch kernel parts
aren't compatible with openvz patchset. Don't know about user mode...

Did you kompile it for the openvz kernel? Can it be done?

Regards
