Vasily Tarasov wrote on Tue, 13 February 2007 10:19Hello,

This is really very strange problem...

Let's try to dig further in it. What do you mean by saying "sends commands"? Is it `ping` command or what?

Can you provide us an access to the node in question?

Thank you!

It's a script that sends TCP commands to the node.

I'll PM you the info.

EDIT: Actually, it emailed it to you. Thanks.
