Subject: Re: Out of Socket Memory on the Hardware Node
Posted by jubo on Tue, 13 Feb 2007 17:29:53 GMT

Vasily,

Thanks for the reply. Is there any sort of formula for how much tcp_mem and tcp_max_orphans
to provision. According to the /proc/user_beancounters I have more than enough numtcpsock for
the VEs. What I am trying to do is minimize loss of service for the web applications.
