You need set interface up in HW before move it into VE:
ip tunnel add tunel0 mode gre local 10.1.2.3 remote 10.2.3.4
ip link set up dev tunel0

Now you can move tunnel interface into VE:
vzctl set 100 --netdev_add tunel0 --save

This work for me on debian-3.1 with kernel 2.6.8-022stab078.14
