If I understood the changelogs correctly, I should be able to use NFS inside a VE on 2.6.18-028test003.1.

But how should one use it? Now my VE doesn't know of filesystem type nfs.

I guess I should at least set VE_FEATURE_NFS, but how to do it?

Current version of vzctl doesn't support NFS feature...

Are there any plans on implementing it?
