When I try to install this template with the command vzctl create 101 --ostemplate altlinux-20060914 --config vps.basic
I see the error 101: invalid option --

So, there's no any concrete option in the error output.

Template was downloaded from the page
http://www.freesource.info/wiki/AltLinux/Dokumentacija/OpenV Z

Do you use vzctl from Alt Linux distribution? AFAIK, they have done some modification in it, including some changes in postcreate script, what can cause the problem... If so, it worths to contact with AltLinux support.

HTH,
Vasily.

This string is copy&paste from ALT Linux Sisyphus Wiki. This sting have problem with '-' character. So solution is easy: You must reenter all '-' from keyboard.
