why don't start postfix? memory in this vps many
$ cat /var/log/maillog
postfix/master[11752]: fatal: socket: Cannot allocate memory

Subject: Re: don't start postfix (postfix/master[11752]: fatal: socket: Cannot allocate memory)

As you can see, fail count for numothersock is more that zero, that means you should increase that parameter. Something like

vzctl set 253 --numothersock 120 --save
should do the trick.
