Subject: *SOLVED* df is blank

Hi folks,

I setup OpenVZ with Gentoo as HN and Gentoo as one node. Everything works perfect (network, portage sharing, ...) but the output of 'df' is blank. 'df' is such a small word so the search did not help me

Due to space problems i moved /vz to /home/vz with a symlink for /vz. I Hope this is not the problem.

Any ideas?

Regards, Christian

Hm... Solved my myself using the following instruction:

'Delete the file /etc/mtab and make it a symlink to /proc/mounts'

Now everything works fine...

mv /etc/mtab /etc/mtab.old && ln -s /proc/mounts /etc/mtab
