hi,

I have just created my first vps with openvz.

I did him with 10GB of disk, but when I type df -h it shows 5.5GB

is this a known problem? any help to fix?

thanks!

Read this article, please: http://wiki.openvz.org/OpenVZ_disk_quota%2C_df_and_stat_weird_behaviour

HTH,
Vasily.

fixed

the problem was that there was not space in the "/" partition

I just change it to /home and it´s working now.

thanks!
