Hi guys, actually im using 2.6.18-92.1.18.el5.028stab060.8PAE (SMP) i was reading on KERNEL FLAVORS

the SMP is:

SMP symmetric multiprocessor up to 4 GB of RAM 10-20 Containers

my servers had 6GB ram, and i had like 15-25 containers.

wich one is the best kernel for me, and also Openvz guys, is the update ready? Vitaliy told me the 11 is gonna be released the update.

thanks

I assume you use 32-bit CentOS 5 for the server node? Have you updated to CentOS 5.4?

There are some major security issues with the kernel you are using at the moment. Any reason you aren't using the newest ovzkernel?

Hello Ales

i was using 5.2 Centos, yesterday i update to 5.4, im on 32Bits and my kernel is this 2.6.18-92.1.18.el5.028stab060.8PAE

to update is.

yum update ovzkernel

or ovzkernel-PAE

so, how to update my kernel??

i have

2.6.18-92.1.18.el5.028stab060.8PAE

using:

yum update ovzkernel

or

yum update ovzkernel-PAE

nothing happen...

New kernel seems to be already installed. Check your /boot/grub/grub.conf to see which kernel is set to default and reboot.
