Subject: [OpenVZ 7] Container Templates
Posted by 63DYxLP1 on Sun, 22 Sep 2019 22:13:59 GMT
View Forum Message <> Reply to Message

Hi Everyone,

How do I access all of the container templates listed here?

Link: https://src.openvz.org/projects/OVZT

Most of the templates do appear to be available, however there are several that aren't available via vzpkg.

```
[root@ ~]# vzpkg list
debian-10.0-x86_64
debian-10.0-x86_64   jsdk
debian-10.0-x86_64   jre
debian-10.0-x86_64   php
debian-10.0-x86_64   proftpd
debian-10.0-x86_64   wordpress
debian-10.0-x86_64   cyrus-imap
debian-10.0-x86_64   mod_perl
debian-10.0-x86_64   spamassassin
debian-10.0-x86_64   mysql
debian-10.0-x86_64   devel
debian-10.0-x86_64   webalizer
debian-10.0-x86_64   phppgadmin
debian-10.0-x86_64   mailman
debian-10.0-x86_64   imp
debian-10.0-x86_64   postgresql
debian-10.0-x86_64   tomcat
debian-8.0-x86_64
debian-8.0-x86_64-minimal
debian-8.0-x86_64    jsdk

https://src.openvz.org/projects/OVZT is development git repo used for internal purposed.
Public yum repositories contains some subset of them -- released templates, ready for external using.

Thank you,
Vasily Averin

Hi!

https://src.openvz.org/projects/OVZT is actual repository with template *sources*.
One should build template RPM from these sources and install it on the node.

BTW, sources are open your pull requests are welcome!

One should build template RPM from these sources and install it on the node.

BTW, sources are open your pull requests are welcome!

Is there any documentation on creating source templates, and building templates out of sources? I would love to contribute, as I've just been building templates by hand without using sources.

I've noticed others doing the same.
