Subject: Unable to migrate container

Good day,

I'm running OpenVZ 7.0.22 (123) on both source & destination hosts. But when I try to migrate a container from one to the other, I get (from /var/log/prl.log):

03-13 11:05:00.494 W /sdk:948174:948178/ Connected directly
03-13 11:05:00.498 I /sdk:948174:948176/ Login response doesn't contain restriction event
03-13 11:05:03.317 I /IOCommunication:948174:948178/ IO client ctx [read thr] (sender 3): Stop in progress for read thread

I have been unable to find out how to fix this issue. I'm hoping you folks can help.

The container I'm wanting to migrate is running Plesk.

This is when running vzmigrate or prlctl migrate? It looks like the latter to me - you could try vzmigrate instead.
