Do you want to install yum or do you want to install something else using yum?

If you want to install OpenVZ using yum start here: http://wiki.openvz.org/Yum

By the way, there are more people monitoring the Support forum so your questions my get more attention there.

Jim

Use vzyum to install yum. Something like:

vzyum 201 install yum

Jim.

Hello When i try to DO that this message appear

vzyum Command not found and im already installed it

[root@ser vzyum]# rpm -q vzyum
vzyum-2.4.0-11

and please if you had MSN ID please provide me it

Thanks

I'm a Linux user, I don't have a msn account.

For some strange reason vzyum is in vzpkg.

Install that

yum install vzpkg

Jim.
