Subject: Patch to correct order of unmounting in vzctl
Posted by Griffon26 on Fri, 28 Apr 2006 22:53:04 GMT

Hi guys,

The attached patch corrects the unmount order in vzctl to follow the
description of it in the user manual (VPS umount before global umount
instead of the other way around). It applies to vzctl-3.0.0.8.

Regards,
Maurice.
