Subject: accessing "nonexistent" /proc/<tid>/

Jean-Pierre noticed, that it's possible to access any task through
/proc/<tid>/, not just the thread group leader.

Is this intentional? I can't find it documented anywhere, but it's
definitely a useful feature. So maybe it's worth making it officially
part of the kernel interface, and adding a note to
Documentation/filesystems/proc.txt?

Miklos
