any help to found a opensuse 10.3 or 11 template?

thanks!

Unfortunately, OpenVZ doesn't support openSUSE.

I hope to improve this situation, but for this to happen, openSUSE community must unite closer to tackle this issue.

I have opened feature-request.

[feature-request] Lightweight virtualization / containers (OpenVZ)
https://bugzilla.novell.com/show_bug.cgi?id=405471

Basically we have 3 problems:
1. No OpenVZ kernel for openSUSE
2. No openSUSE guest OS template
3. No Documentation - Official docs are very Red Hat centric.

I can write the docs, but other people need to help me with other issues.
