I had the same issue on sarge, if your initrd.img does not exist in /boot or /, create it:

```
cd /boot
```

```
mkinitrd -o /boot/initrd.img-2.6.18-028test015.1+31-ovz 2.6.18-028test015.1+31-ovz
```

Then link /initrd.img to the correct initrd.img:

```
ln -s /boot/initrd.img-2.6.18-028test015.1+31-ovz /initrd.img
```

Re-run lilo -v and see if it's okay now..
