The following wiki page should be updated:

http://wiki.openvz.org/Installation_on_Debian

because the link to the config file is no longer valid. Instead of

"Or get a 2.6.18 kernel config from http://download.openvz.org/kernel/devel/current/configs/

wget http://download.openvz.org/kernel/devel/current/configs/kern
el-2.6.18-028test010-i686.config.ovz -O .config"

it should be:

"Or get a 2.6.18 kernel config from http://download.openvz.org/kernel/branches/2.6.18/current/co
nfigs/"

and the absolute link to the config file should also be updated.

Hello,

Thank you for the report, can you do it by yourself? Wiki is collaborative service, so if you find some mistakes, please, fix it by yourself...

Thank you in advance,
Vasily.
