HI!,
How can I see the CPU utilization of each VPS over the Hardware Node.
The command 'vzcpucheck' only display the amount of cpuunits for each VPS, but I can't see if any VPS is using the CPU strongly.

Thank you, very much.

Hello

run something like this on hw node:

for ve in `vzlist -H -o vpsid`; do echo "VE$ve":; vzctl exec $ve cat /proc/loadavg; done
