I've followed the guide for Fedora Core 4 and got upto starting OpenVZ (before doing templates etc)

i'm issuing the following but it just tells me it failed why?

#/etc/init.d/vz start
Starting OpenVZ: [FAILED]

i'm a bit of a newbie to this and Linux

Can you post
Quote:# uname -a
output here, please.

You are working on FC kernel, not OpenVZ kernel!
If you've installed OpenVZ from RPMs
choose OpenVZ kernel during boot procedure, please.

I suppose you are using GRUB, so just add appropriate
default string to /boot/grub/grub.conf.
Something like that:
[QUOTE]default=0[QUOTE]
If OpenVZ kernel is first in the list of kernels.
