kir wrote on Sun, 18 February 2007 20:17 See, kernel is the same across all VEs. VEs are pretty much like ordinary Linux systems, it's just that all VEs on the same physical box run under the same kernel.

Okay, thanks. I did understand the VEs all share the same kernel. I am trying to understand the ramifications of that requirement. My concern is that a VPS user will do something like distupgrade and find themselves in hot water.
