Hi All...

I am trying to install OpenVZ on my Debian Etch system. I added the following line to my /etc/apt/sources.list file:

```
deb http://debian.sysys.org/ testing openvz
```

I then ran:

```
apt-get update
```

and the result was:

```
Err http://debian.sysys.org testing/openvz Packages
```

```
404 Not Found
```

```
Hit http://security.debian.org etch/updates/main Packages
```

```
Hit http://security.debian.org etch/updates/contrib Packages
```

```
Hit http://security.debian.org etch/updates/main Sources
```

```
Hit http://security.debian.org etch/updates/contrib Sources
```

```
Fetched 2B in 0s (3B/s)
```

```
Failed to fetch http://debian.sysys.org/dists/testing/openvz/binary-i386/Packages.gz 404 Not Found
```

```
Reading package lists... Done
```

```
W: Couldn't stat source package list http://debian.sysys.org testing/openvz Packages (/var/lib/apt/lists/debian.sysys.org_dists_testing_openvz_binary-i386_Packages) - stat (2 No such file or directory)
```

```
W: You may want to run apt-get update to correct these problems
```

```
E: Some index files failed to download, they have been ignored, or old ones used instead.
```

Can someone please tell me what I did wrong?

Thanks...
